POSIZIONE RICOPERTA

Lead Software Engineer – Senior Software Architect

TITOLO DI STUDIO

Master's degree in Economics

PROFILE

Senior IT professional with 25+ years of experience in software engineering, business process optimization and enterprise application development within the banking sector.

Currently leading application development and process automation initiatives, with a strong focus on **digital transformation, system integration, and AI-driven workflow optimization**.

Recently specialized in **Generative AI and LLM-based solutions**, designing intelligent automation systems to improve internal efficiency, decision-making, and process orchestration.

Strong ability to bridge **business needs and technical implementation**, working closely with stakeholders to translate requirements into scalable, high-impact solutions.

CORE SKILLS

- Business Process Analysis & Optimization (BPMN, Process Mining)
- IT Business Analysis & Functional Requirements Definition
- Project Management & Delivery (end-to-end lifecycle)
- Enterprise Applications (Web Platforms, Banking Systems)
- System Integration (API, Microservices, Legacy Systems)
- **Generative AI & LLM Solutions (LangChain, LangGraph, RAG architectures)**
- Workflow Automation (RPA – UiPath, BPM Engines)
- Stakeholder Management & Cross-functional Communication

EMPLOYMENT HISTORY**09/2009 - today****Software Development Area Manager**

C-Global Spa (Gruppo ION) - Collecchio (PR)

Lead the development and evolution of enterprise web applications and digital platforms, supporting banking back-office operations and customer-facing services.

Key Responsibilities:

- Analyze business processes and collaborate with stakeholders to identify optimization opportunities
- Translate business requirements into technical solutions and implementation roadmaps
- Manage end-to-end IT projects (scope definition, planning, execution, testing, delivery)
- Coordinate internal teams and external partners
- Oversee system integration across heterogeneous enterprise environments
- Define architecture, technology stack, and development standards

AI & Innovation Focus:

- Designed and implemented **Generative AI solutions based on LLMs** to automate internal workflows and knowledge processes
- Developed **LLM-based agents** for:
 - process support and decision assistance
 - automated document analysis and information extraction
 - conversational interfaces for internal tools
- Built **RAG (Retrieval-Augmented Generation) architectures** to integrate enterprise knowledge bases into AI-driven applications
- Applied **process mining + AI** to identify inefficiencies and optimize workflows
- Contributed to **AI adoption strategy** within business processes

Key Achievements:

- Improved operational efficiency through automation and AI-driven solutions
- Reduced manual workload in back-office processes via RPA and intelligent systems
- Successfully delivered multiple cross-functional IT projects on time and within budget

01/2002 - 09/2009 Full-stack web developer

C-Global Spa (Gruppo Cedacri SPA)

- Designed and developed enterprise web applications in Java
- Contributed to the creation of the corporate web portal enabling customer interaction with banking processes
- Worked on both frontend and backend components

07/1998 - 01/2002 Software Developer Cobol/Unix

C-Global Spa (Gruppo Cedacri SPA)

- Developed software for banking back-office systems
- Worked in MVS and Unix environments

MVS Software Developer
09/1996 - 07/1998

Comitsiel Spa (Gruppo Banca Commerciale Italiana) - Milano (Mi)

- Developed and maintained software for financial entities (funds, asset management, pension systems)

01/1996 - 09/1996 Junior Developer

MethoSystem Srl - Collecchio (Mi)

- Developed banking software in COBOL (mainframe environment)

EDUCATION
1989 - 1995 Master's Degree in Economics

Università degli studi di Parma, Parma

Native Language

Italian

Other Languages

	UNDERSTANDING		SPOKEN		WRITING
	Listening	Reading	Interaction	Oral	
English	C1	C2	C1	C1	C1
French	B1	A2	A2	A2	A2

Technical Skill
Languages & Frameworks:

Java (Spring Boot, MVC, Data, Security), Angular, TypeScript, SQL, COBOL

Integration & Architecture:

REST API, SOAP, gRPC, Microservices

Process & Automation:

Camunda, jBPM, BPMN, UiPath, Process Mining

AI & Data:

- Machine Learning / Deep Learning (TensorFlow, PyTorch, Scikit-learn)
- **Generative AI (LangChain, LangGraph, LLM orchestration, RAG systems)**

Tools:

Docker, Git, Maven, IntelliJ, Eclipse, Jupyter

Databases:

Oracle, SQL Server, MongoDB, MySQL

KEY STRENGTHS

- Strong analytical and problem-solving mindset
- Ability to align IT solutions with business objectives
- Experience in managing complex, multi-stakeholder projects
- Effective communication between technical and non-technical
- Leadership and team coordination
